Conveniently located just south of Dayton off I-75 at exit 50 (Dryden Road). From I-75 turn left onto Dryden Rd. and take your second left onto North Moraine.

Hours of Operation are  
"24 Hours a day"  
to provide our clients with  
Fast turnaround

*"We Listen, We Understand,  
We Respond"*

We have used the services of American Testing for several years to take care of our x-ray and mag particle inspection needs and have always received excellent service. A few years ago we had an emergency situation and I called upon Chris to do some velocity testing for us and his company took care of our need with little notice when we were in a tight pinch. I look forward to working with American Testing in the future as the need arises.

Bruce Christian QA GSV - Intat Precision Inc

Chris Small and the Team at American Testing Services have provided NDT testing services and technical expertise in a professional and timely manner on numerous projects for us. Their efforts to provide a quality service to meet our clients' needs and tight schedules are in step with our organization's goals. "American Testing is an asset to our Field Services Department."

- Randy Dew - Bowser-Morner, Inc.

ATS understands my company's business and is very responsive to our needs. Turnaround time can be paramount to meet our delivery schedules and ATS's staff always delivers. I know I can count on their technical expertise and in fact, I encourage my customers to consult with them, too."

- Beth Umina - Morris Bean & Company

They are a very qualified group of nondestructive testing personnel. In all cases they have been quick to respond and have met any commitments they have made.

HondaTransmission

"American Testing has proven time and time to be a valuable NDT resource in the roles of production capacity, metallurgical evaluation, training, and Level III consulting."

- Hartzell Propeller, Inc.

*"Providing Personal Service With Integrity"*

# American Testing Services, Ltd

was established on the belief that quality, customer service, and delivery are the foundation of our company. We offer our customers more personal attention and a great amount of focus on their needs.

ATS offers a wide variety of capabilities ranging from conventional NDT services through advanced inspection technologies.

We offer a full-service, modern 14,000 sq. ft. facility with a wide range of services. We are able to mobilize virtually every NDT method to the field that we do in our laboratory.
